

A new reservoir and its connecting infrastructure is proposed in your area

Consultation open from 30 May – 9 August 2024

Anglian Water is proposing a new reservoir in Lincolnshire that will secure water supply to our customers for future generations.

The reservoir will store water so it's on tap when we need it, meeting the challenges of a changing climate and growing population.

Our latest proposals include an emerging design for the reservoir and the infrastructure we need to transfer water to the reservoir, treat the water, and supply it to homes and businesses across the region.

Your feedback can help shape our proposals. We're holding events in your area. Visit our website for more information and detailed maps.
